

**Highlights****PhytoSUDOE  
Workshop**

PhytoSUDOE

**Registration open for the second stakeholders' workshop.**

It will be held in Oporto on the 17th of April. Stakeholders can apply for registration through the 'Contact' section of our website. Updated info in our 'Events' section.

**Dates confirmed for the 2nd stakeholders' workshop, the 3rd summer course and our Final Conference**

The 3rd edition of the summer course and the project's Final Conference will be held in Vitoria-Gasteiz on the 9th-10th and the 11th of October, respectively.

**Phytotechnologies as to reduce toxicity of Copper-polluted soils**

The results about the phytotoxicity on lettuce plants of soils contaminated with metals (including samples from S1 and S8 of PhytoSUDOE) and subjected to various phytomanagement options have been published.

**More news**

- Plantations and tests for phytoremediation in site S3 (Borralha mine, Portugal)
- Phytoremediation experiments with rosemary in Site S4: São Domingos.
- 36 students attend to the second edition of the PhytoSUDOE project summer course. PDFs of the presentations available.
- New experimental plots in S7 (Rubiais mine) and S8 (Touro mine), Galicia (Spain).
- First results at the Vitoria-Gasteiz plots (S5 and S6 sites).
